

Palchuk O.I.

Senior Lecturer at Department of Business Economics
Kyiv National University of Technology and Design

THE DEVELOPMENT OF HUMAN RESOURCES IS THE MAIN FACTOR OF ECONOMIC DEVELOPMENT

Economic growth is the central economic problem and facing all countries. Its dynamics shows the development of national economies and living standards of the population. This is the main indicator of development and well-being of any country, one of the main macroeconomic purposes. The formation of market environment in Ukraine and the tapering of the international competition require radically change the approaches to economic growth of the domestic economy. The adoption of the "new economy" in developed countries, the development of which is based on knowledge and innovation, encourages the realization that the search for optimal ways to effective long-term development of Ukraine should be in the plane recognition of the human capital theory and the actual implementation of its leading provisions in the practice of market transformations. Of course, the development is impossible without the participation of human potential. Without competent, highly skilled professionals we can not to make a significant breakthrough in the development. Therefore, the development of human resources as the most important factor of economic growth requires constant attention of researchers.
